RG™
PRO
SUSPENSION

For 2017, we set out to raise the bar in offroad suspension. So, naturally, we teamed up with the man who not only raises the bar in everything racing, but just plain puts it out of reach of the competition with his 30 years of experience designing and developing race machines. We couldn't be more excited to partner with offroad racing legend Robby Gordon.

Race ready and Baja inspired, this new design keeps the tire patch perpendicular to the ground for superior traction and control.

New Trailing Arm Design

The rear trailing arm gives you the travel you need with the tracking control you want in fast conditions. Add the King adjustable dual-rate spring shocks, and when it's time to drop the hammer, your tires stay in a straight track throughout suspension travel. That means less side-to-side movement so you can maintain the line.

Wildcat Sport

A low center of gravity and high power-to-weight ratio give you better acceleration, climbing ability and top end speed. The nitrogen-charged JRI ECX shocks will keep you comfortable and grounded all day as you rock with 12" of clearance on or off the trail.

WILDCAT SPORT XT™

WILDCAT SPORT LIMITED

WILDCAT SPORT LIMITED RIDE PACKAGE FEATURES

- Full aluminum doors
- Elka® Stage 5 shocks
- Color-matched ROPs, A-arms and aluminum wheels

PROWLER

Trail ready and farm approved, these machines offer class-leading storage and a tilting rear cargo box that hauls up to 500 lbs. The 500 moves it all with a smooth 443cc, SOHC engine designed with a closed-loop EFI system that boasts 25% better fuel economy.

PROWLER® 500

The XT models come with a bigger motor (951cc in the 1000 and 695cc in the 700), 600-lb. carrying capacity and a huge underhood storage space. Equipped with tough Surtlyn® body panels and an HSLA steel frame, these Prowlers are ready to take you anywhere you want to go.

PROWLER 700 XT

PROWLER 1000 XT

PROWLER 700 XT / 1000 XT RIDE PACKAGE FEATURES

- Electronic power steering (EPS)
- Four-wheel hydraulic disc brakes by Hayes
- Aluminum rims

ATVs and ROVs can be hazardous to operate. Improper use can cause severe injury or death. Each rider must wear a seat belt (on ROVs), an approved helmet, eye protection and protective clothing; use handholds/steering wheel and stay completely inside the vehicle. ROV operators must have a valid driver's license (no operators under age 16) and all riders must be able to sit with their back against the seat, feet flat on the floor and hands on handholds/steering wheel. Each rider must read and understand the operator's manual before riding. Follow all instructions and warnings. Avoid abrupt maneuvers, paved surfaces, hard acceleration when turning, and sidehilling; slow down before entering a turn. Never engage in stunt driving. Avoid excessive speeds and be particularly careful on difficult terrain. Never carry a passenger in the cargo box or exceed seating capacity on an ROV; never carry a passenger on a single-rider ATV. ATVs are recommended only for users over 12 years old. Only ride an ATV that is right for your age. Supervise riders younger than 16. Never operate on public roads unless designated for off-highway vehicle access — collisions with cars and trucks can occur. Never drive or ride under influence of alcohol or drugs. Do not shoot from or lean firearms or bows against the ATV or ROV. Arctic Cat recommends that all riders take a training course. For safety or training information in the U.S., call the ATV Safety Institute at (800) 887-2887. In Canada, please contact the Canada Safety Council at (613) 739-1535 or see your dealer. For ROV training visit <http://rohva.org>. Along with concerned conservationists everywhere, Arctic Cat urges you to "Tread Lightly" on public and private lands. Ride only on designated areas or trails. Preserve your future riding opportunities by showing respect for the environment, local laws and the rights of others when riding.
