• Kawasaki cautions you that whenever the power output of a motorcycle is increased, reliability and durability may decrease. Therefore, proper and perhaps more frequent maintenance and repair work becomes especially important. The Kawasaki Service Manual contains information that will help you to perform essential maintenance and repairs. This manual can be obtained from any authorized Kawasaki dealer or online at Kawasaki.com.

• Installation of race parts requires mechanical knowledge, proper tools and, in some cases, the re-tuning of engine and suspension components. For best results, an experienced tuner should make racing modifications. You may wish to take your vehicle to an authorized Kawasaki dealer to have race parts installed on your motorcycle. There will be a charge for installation.

• Prices, product and specifications are subject to change without notice or liability. Availability is subject to production, stocking and demand. The purchaser accepts all responsibility concerning installation of race parts, including quality, performance, cost or service and/or necessary repairs.

- Kawasaki Accessories or other items in this Performance Parts section are subject to the following conditions:
- These items are intended for closed-course competition only.
- Alteration of emissions-related components can constitute violation of federal and/or state laws. Substantial fines and penalties can result if used for other than closed-course competition use.
- Use of unauthorized components and use of a vehicle in competition can affect a vehicle's warranty coverage.
- Kawasaki Accessories used in competition are not covered by any warranty and are not returnable.
- Quantities may be limited and replacement parts may not be available.
