PURE AND PROVEN.

Superior ride and handling. That is the very essence of a Polaris snowmobile and with each generation of riding technology, what differentiates our sleds from all others. Naturally, the ultimate ride also demands the best riding apparel. That's where Pure Polaris comes in. Our helmets, jackets, bibs, boots, gloves and casual wear are designed by riders for riders. They are fully featured to keep you comfortable so you can stay on the trails longer. Whether you ride the fast trails, tour with family and friends or seek out deep powder at high elevations, trust Pure Polaris to help you turn a good day into a great day.

The following symbols appear next to many of the products in this catalog. They represent our three premium Pure apparel and accessories lines: Velocity, Octane and Freeride. Each line is designed with a specific kind of rider in mind. The descriptions below are a general guideline to help you decide which line to look for as you choose gear for your riding style. We realize your style and needs are unique to you so all Pure products can be seamlessly mixed and matched in an endless array of customizable options.

VELOCITY

Feed your need for speed with our Velocity apparel and accessories for the performance rider. If you're a rider who never backs down from a challenge and a straight line - Velocity is for you. Velocity apparel means racing across a lake at high speed and not feeling the wind-chill. Designed for warmth and versatility, most jackets have removable liners, while high performance graphics express the Velocity personality. Velocity accessories also give your sled a look that echoes its speed, from performance windshields to colored accessories that will set it — and you — apart.

CONDITIONS: Colder, dryer. **TERRAIN:** Flatter, hard pack.

OCTANE

Octane apparel and accessories are designed for those who don't ride trails — they blaze them. Pure Octane outerwear has flexibility that won't restrict your mobility or imagination over the snow or above it. Designed for layering, the jackets provide versatility for all riding conditions. Wear the shell alone on warmer days or wear with a liner in colder weather. Octane accessories improve your performance and control over your machine wherever you take it.

CONDITIONS: Warmer, wetter. **TERRAIN:** Mountainous, moguls.

FREERIDE

FreeRide is for the touring rider who takes the time to enjoy the beauty of nature and the pleasure in a long journey. FreeRide helmets and apparel are for exploring with style and comfort while hardy accessories transport all of your trip necessities. The helmets, jackets, and bibs feature fixed insulation designed to keep you warm and comfortable. FreeRide accessories allow you to go where you want, when you want, for as long as you want. FreeRide hard luggage is lockable and easily detached, while modular luggage racks allow you to carry just about anything you'll need for that long winter ride.

CONDITIONS: Cold, dry. **TERRAIN:** Flatter, hard pack.

HELMETS

QUALITY, COMFORT, STYLE.

No two riders are exactly alike, which is why we build such a wide variety of helmets. Every quality Polaris helmet is designed for riders by riders. Wear a Polaris helmet and you're assured of Pure warmth, comfort and protection.

CYCLONE HELMET

A high-performance, lightweight helmet featuring our exclusive anti-fog, PureSeal Technology. It uses a custom-fit breath deflector to capture exhaled air and exhaust it through dual venturi vents.

Shell: Strong, lightweight fiberglass.

Shield: Anti-fog and anti-scratch coatings. Quick-release ratchet system. Optional electric shield (#2868215).

Vents: Dual venturi exhaust vents, chin vents and elongated crown vents.

Breath Deflector: PureSeal Technology prevents fogging.

Interior: Removable, washable, moisture-wicking liner.

Valance: Removable, semi-rigid, flexible valance.

Safety: Snell M2005/DOT through 2XL/DOT approved through 3XL.

PURESEAL TECHNOLOGY

We looked at more than 15 snowmobile helmets on the market. Our engineers tested them under controlled temperatures and wind speeds, comparing their advantages and flaws. Then we added human factors to those tests, such as a person's size, fitness level, gender and riding style. We used the collected data to build a variety of prototypes with the best anti-fog characteristics. The result is the AF-1 and Cylone, the most technologically advanced, anti-fog helmets in Polaris history. Try to fog these helmets, we dare you.

→ PureSeal Technology works by redirecting your breath outside the helmet. The helmet shield stays clear of fog, providing the rider with maximum visibility.

A. AF-1 HELMET

The industry's finest high-performance, anti-fog helmet, featuring PureSeal technology.

Shell: Alloy polycarbonate shell.

Shield: Anti-fog and anti-scratch coatings. Optional electric shield (#2852435).

Vents: Dual venturi exhaust vents and adjustable crown and chin vents.

Breath Deflector: PureSeal Technology prevents fogging.

Interior: Removable, washable Nyltex lining.

Safety: Snell M2005/DOT approved.

B. MODULAR HELMET

Our top of the line helmet is designed for serious sled-heads. The ultimate combination of protection and visibility, including an aviator-style breath deflector. Full face of helmet lifts up for ease of use.

Shell: Aramid shell and polycarbonate chin bar offer excellent impact absorption.

Shield: Anti-fog, anti-scratch coated. Optional electric shield (#2852435).

Breath Deflector: Includes 360° interior foam for superior breath seal and stronger arm to lock deflector in place. Aviator-style mouthpiece with venturi vent clears exhaled air from breath deflector system.

Interior: Our plushest, moisture wicking liner. EPS liner for impact protection. High-density foam barrier restricts cold air intrusion at visor seams.

Additional Feature: Drop-down sun visor reduces sun glare.

Aerodynamic design decreases wind resistance and "chatter."

Safety: DOT approved.

MEN'S JACKETS

NAME YOUR RIDE AND WE HAVE YOUR JACKET.

Mountain riders, our new, ultra-lightweight and super-breathable Mountain eVT Jacket has your name on it. Aggressive trail riders, slip on the high-performance IQ Jacket. Night riders, check out the Lightning Jacket with illuminated back patch. There's also the Ripper Jacket for extreme cold, the Torque Jacket for the budget conscious, and more. Every Polaris jacket is purpose-built for the way you ride, with 100% Pure warmth, comfort, mobility and protection.

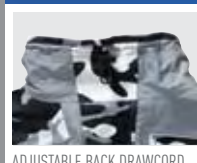

MOUNTAIN eVT JACKET

This next generation Mountain jacket, featuring eVent® fabrics, breathes faster than Gore-Tex® and other waterproof fabrics. Equipped with more features, including full zip vents and extra pockets, Mountain eVT is for the steep and deep. Add a Polaris layering system to ride warm and dry all day.

- Shell:** 100% Nylon Shell
- Waterproof Breathable:** eVent® fabric
- Insulation:** Non-insulated, mesh lined.
- Venting:** Full zip vents at underarm and back (vertical vents, won't interfere with backpack).
- Pockets:** Three exterior pockets, one with chamois cloth inside to wipe goggles/shield, two interior pockets.
- Additional Features:** Waterproof two-way front zipper, zipper garages on exterior pockets create tight seal. Microfleece rollover collar for rider comfort. Snow skirt, neck drawcord and adjustable back drawcord keep snow out. Wrist snaps reduce ice buildup.
- Safety:** 3M® reflective piping and ellipse patches.

- #2868002 | Gray / Camo

WATERPROOF

BREATHABLE

FEATURES:

Gray Camo Mountain eVT Jacket, Mountain eVT Bib, Black Approach Glove, Shadow Dragon Beanie

MOVE OVER GORE-TEX®, WE JUST REINVENTED STAYING DRY.

Independent tests show eVent® Direct Venting Technology moves sweat to the outside of fabric faster than Gore-Tex®. Don't take our word for it, see more of the science behind this amazing technology at www.Polariskeepsyoudry.com. Found exclusively on Pure Polaris apparel, this fabric keeps even the most high-energy mountain rider dry inside and out.

The next generation of breathable and waterproof fabrics will keep riders dry "inside and outside". Only eVent's® Direct Venting Technology moves sweat directly to the outside of the fabric in one easy step and at record speed. Its unique composition allows millions of tiny fabric pores to breathe at their full potential at all temperatures.

With eVent® wind and waterproof fabrics you'll enjoy another level of protection. Patented surface treatments and fabrication methods keep out water, even hard driving rains, but won't block the millions of tiny pores that let the sweat out.

"I was dry and warm all day."

Lane Lindstrom, Editor, SnoWest Magazine

"Breathable and super lightweight!"

Cole Simonsen, Mountain Green, UT, Boondocker

"I was impressed...it breathed a lot. I never got too hot or too cold. And I never got wet."

Ryan Harris, Editor, SnoWest Magazine

GO FOR HIGH-PERFORMANCE LAYERING.

Save the cotton tee shirts and sweatshirts for after the ride. Before you head out for an all-day ride, dress smart. Start with a base layer that will wick away your sweat, like those shown on pages 32-35. Next, slip on an insulating layer, like a fleece top. Top it all off with one of our quality men's jackets featuring waterproof and breathable fabric.

Mountain eVT Bib, Gray/Camo Mountain eVT Jacket, Black Approach Glove and Shadow Dragon Beanie

NEVER UNDERESTIMATE THE VALUE OF A GOOD PAIR OF BIBS.
These days, you can buy cheap bibs just about anywhere. The good bibs are right here. Bibs designed for hammering trails, not just shoveling snow. Bibs with all the "must-have" features serious riders need to stay warm and comfortable, all day, in any weather. One bib designed specifically for mountain riders, another for aggressive trail riders. Heading out for a quick 2-hour ditch banging session? Check out our Race Shell Pant. There's a Pure bib for everyone.

MOUNTAIN eVT BIB UNINSULATED
Designed by mountain riders and Polaris engineers. Features premium eVent® fabrics, the latests in waterproof breathable technology. Together with comfort-driven details including a Neoprene harness with Velcro® straps, its uninsulated, lightweight construction makes it ideal for layering. Wear with coordinating jacket and turn a good day into a great day of riding.

Jacket Compliment: Mountain eVT Jacket
Shell: 100% Nylon Shell
Waterproof Breathable: eVent® fabric
Insulation: Non-insulated, lightweight construction for mountain riding.
Pockets: Two exterior pockets.
Additional Features: Fully mesh-lined, neoprene harness with Velcro® instead of buckles, crossable straps to prevent pectoral irritation, elastic back, waterproof two-way front zipper, full-length side zipper opens to hip, zipper garages, cuff straps with snaps for snug fit around boots, gaiters with snaps.

www.Polariskeepsyoudry.com

BREATHABLE The next generation of breathable and waterproof fabrics will keep riders dry "inside and outside" even under the most aggressive mountain conditions. Unlike conventional waterproof fabrics, including Gore-Tex®, eVent's® Direct Venting Technology moves sweat directly to the outside of the fabric in one easy step and at record speed. Its unique composition allows millions of tiny fabric pores to breathe at their full potential at all temperatures. It's like having a built-in thermostat in your riding gear – keeping you drier, cooler and more comfortable no matter how intense the ride.

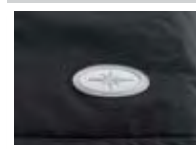

WATERPROOF With eVent® wind and waterproof fabrics you'll enjoy another level of protection. Patented surface treatments and fabrication methods keep out water, even hard driving rains, but won't block the millions of tiny pores that let the sweat out. Whether you're waist high digging your sled out, or in the midst of a whiteout, rest assured you'll stay dry.

WOMEN'S JACKETS

THESE ARE NOT YOUR MOTHER'S JACKETS.

One look and you know these jackets are for serious women riders. Beneath their sporty, feminine designs are the same high-tech fabrics, warm and breathable insulation, functional pockets and many other features proven over time in our men's jackets. There is a women's jacket that matches your eye for fashion and value.

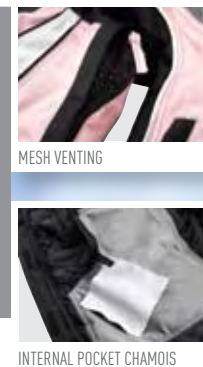

DIVA JACKET INSULATED

The jacket for serious women riders. Built for all-day comfort like our men's, but with feminine styling.

LAYERING IS KEY TO COMFORT.

The beauty of Pure Polaris women's riding apparel is it lets you dress for comfort and fashion. Just make sure you layer it properly. Start with a base layer of polyester to wick away sweat, otherwise you'll be both cold and wet. Your insulating layer should be fleece or polyester, something from page 35. Finally, choose a jacket and bib combination that matches the weather you normally ride in.

WOMEN'S BIBS + PANTS

NOW WOMEN WEAR THE PANTS (AND BIBS) IN THE FAMILY.

If you've ever worn a pair of men's bibs you know they're neither fashionable nor functional for women. These pants and bibs keep you in style, with functional features like an ingenious drop seat and specially designed suspenders.

ESCAPE BIB

Our best bib for serious women riders. Performance features match the men's version, but with special suspenders and a clever drop seat for women.

Shell: 300 denier Cordura®.

Waterproof Breathable: (3000mm/3000g).

Insulation: 100g ThermoLite® Plus.

Pockets: Two hand warmer pockets.

Additional Features: Adjustable suspenders and leg gaiters, drop-seat design, full-length side zippers, fully tapered seams.

Safety: 3M® reflective ellipse patches.

#2856211 | Black

\$209.99 US \$239.99 Can | Women's S - 2XL*

*Includes Talls (M - L) - Petites (M - XL)

Cordura® is a registered trademark of INVISTA North America S.A.B.L.

A. CHILLY PANT

If you ride, ski, snowboard or just like a good snowball fight, these relaxed but totally insulated pants will keep you dry and toasty warm.

Shell: 660 denier Taslan®.

Waterproof Breathable: (3000mm/3000g).

Insulation: 200g ThermoLite® Plus.

Pockets: Two handwarmer pockets, one thigh pocket with waterproof zipper.

Additional Features: Snowboard style, relaxed fit for comfort and mobility, fully taped seams, adjustable waist and leg gaiters, and boot tabs to secure to boots.

Safety: 3M® reflective ellipse patches.

FLEECE + BASE LAYERS

LAYER UPON LAYER OF QUALITY AND VALUE.

Fleece isn't just for layering anymore. It's for everyday use on and off the trail, and nobody does it better than Polaris. Our soft and warm fleece jackets and vests have all the right features for layering beneath your snowmobile jacket, plus a great look as casual wear. For very cold weather, choose from a wide variety of base layers.

MEN'S BARRIER FLEECE JACKET

- » Anti-pill microfleece
- » Drop tail hem
- » Elasticcord hem that cinches jacket around hips to seal in warmth
- » Multiple storage pockets
- » For layering or streetwear

#2868038 | Black
 #2868039 | Black / Red
 \$69.99 us \$79.99 Can | S - 2XL

COLD-WEATHER LAYERING.

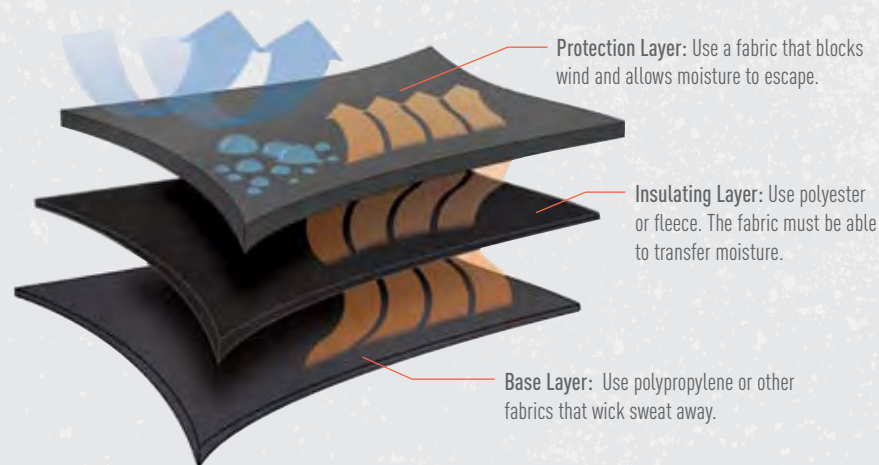

There is no perfect layering system. Everyone has different needs. But there are basic rules for layering. The base layer needs to wick sweat away from your skin. Polypropylene is good, cotton is bad. The insulating layer must work with the base layer to transfer moisture. Polyester and fleece are best. A good outer layer must block wind and also allow moisture to escape. Add or remove layers as needed to stay warm and comfortable.

■ Protection Layer ■ Insulating Layer ■ Base Layer

The three layering combinations above contain different layers giving you different results. Try adding and removing layers to meet your level of warmth and comfort.

THE ANATOMY OF EFFECTIVE LAYERING.

GLOVES

PURE FLEXIBILITY, WARMTH AND STYLE.

We wear them and ride with them all winter. No wonder our gloves get better each year. All our gloves are flexible and waterproof, built with a wide variety of styles and high-tech features so you're sure to find a pair that matches your riding style and performance level.

This next generation of breathable and waterproof fabrics will keep riders dry "inside and outside" even under the most aggressive mountain conditions. Unlike conventional waterproof fabrics, including Gore-Tex®, eVent's® Direct Venting Technology moves sweat directly to the outside of the fabric in one easy step and at record speed. Its unique composition allows millions of tiny fabric pores to breathe at their full potential at all temperatures.

With eVent® wind and waterproof fabrics you'll enjoy another level of protection. Patented surface treatments and fabrication methods repel water, but won't block the millions of tiny pores that let the sweat out, keeping your hands dry.

OUTSIDE: 10° AND SNOWY. INSIDE: 98.6° AND DRY.

Introducing revolutionary eVent® fabrics, exclusively on Pure Polaris apparel. This fabric keeps even the most high-energy mountain rider dry inside and out.

BALACLAVAS + TekVests

MOST BODY HEAT IS LOST FROM YOUR HEAD.

As important as gloves and boots, the balaclava keeps your head warm. And when your head is warm, your body loses less heat, and you stay warmer and ride longer. We offer a full range of fabrics and cuts so you always have just the right balaclava to match your needs.

WATERPROOF/BREATHABLE SHELL MATERIAL

Membrane & Coating Shell Materials:

The outerwear shell materials we use come in varying degrees of waterproofing and breathability (WP/B) to match your particular riding style and climate. Often, a protective film or lamination is applied to a fabric to give it WP/B. Levels range from a PU coating which offers basic water resistance, to extremely high levels of breathability and waterproofing that keep users cool and dry in extreme wet or snowy conditions. The shell materials we use are listed here and are arranged in order from premium to basic WP/B.

Fabrics that are labeled as breathable allow perspiration vapor to escape through the fabric (almost as if the garment were exhaling) to minimize the amount of moist air trapped inside a garment. This helps keep the wearer drier—and thus warmer and more comfortable—than do traditional fabrics that do not "breathe."

Fabrics that are noted as waterproof prevent water from seeping through and soaking the fabric. This is a great benefit to a snowmobiler, who is outside in moist air and wet snow all day. The seams of garments marked with better or best waterproof/breathable technology are fully taped so moisture cannot sneak through where panels of fabric are stitched together.

eVent®:

eVent Fabric is a Direct Venting™ waterproof barrier that marks a significant advancement in ePTFE laminate technology. Using proprietary and patented Drysystem™ technology, eVent Fabric sets a new standard for comfort by allowing perspiration to dissipate and vent without saturating the inside of the fabric.

Reissa®, MVT® & Hipora®:

These coatings have a breathable polyurethane coating that is highly reactive to weather conditions. MVT, Reissa® and Hipora® are extremely thin, lightweight, waterproof coatings which allow for bulk free wearing comfort but are also highly durable to survive extreme outdoor sports and weather conditions. Levels can vary from 2000mm/2000g to 20,000mm/20,000g.

Polyurethane:

Polyurethane coated shell fabrics are water resistant, blocking wind and water. Entry levels can range from 600mm to 1000mm. Provides water resistance without breathability.

FABRICS

Denier levels (420 vs. 660):

Denier levels refer to the thickness/weight of a fiber. It indicates the material's durability. The higher the denier, the thicker the fiber; the lower the denier, the finer the fiber. Polaris uses fabrics with both 420 deniers and 660 deniers to optimize both riding comfort and protection.

Cordura®:

Maximum durability is what this fabric is known for and is used in products that take a beating – luggage, backpacks, boots and performance apparel. Cordura® resists tears, abrasions and scuffs like no other fabric of its kind or weight. This fabric is ten times more durable than cotton duck, three times more durable than standard polyester and twice as durable as standard nylon.

Oxford Nylon:

Oxford is a soft, basket weave fabric made from man-made materials. It is somewhat porous, giving its face (surface) a coarse "pin head" appearance.

Taslan®:

This fabric is constructed of a number of materials including a trademarked textured yarn and polyamide fibers. These fibers are steamed so that they swell and become softer, but retain their durability and resistance to wind and water. Taslan appears as if it has "lines" on its face (surface).

INSULATION

Insulation:

The insulation layer in a garment often determines how it will be used. Preference, body type and climate play a role, but the most important factor may have to do with the type of rider you are. If you ride often and are a technical, aggressive rider, our premium insulators may be exactly what you want. If you are an occasional, touring or trail rider our more affordable lines may be for you. The types of insulations we use in our garments are listed here in order of premium to basic.

Thermolite® Plus:

Thermolite® Plus is even less bulky and thinner than Thermolite®. Made from non-alkaligenic recycled polyester fibers. It has exceptional durability after repeated washings and has more warmth than down when wet.

Hollofil® II:

A premium, high loft insulation that provides dependable warmth and durability. Hollofil II offers consistency in loft, fiber content and insulating capabilities. Special four-hole fibers trap more air for greater warmth. It is engineered for cold weather apparel and sleeping bags to provide enhanced thermal performance along with freedom of movement. It limits radiant heat loss and greatly reduces convective heat loss.

Polyfil®:

Polyfil is 100% polyester insulation that is machine washable and provides soft, affordable comfort. Polyfil is used for general outerwear, sportswear and accessories to provide warmth and comfort and retains its insulating ability even under damp conditions.

Outlast®:

Used in our socks, Smart Fabric Technology™ by Outlast balances temperature so that your feet can stay cool, dry and comfortable throughout the entire day regardless of your body temperature or how hard you are riding.

Coolmax®:

Coolmax fabrics are made of specially engineered fibers that transport perspiration away from the body to the surface of the garment, where it evaporates quickly. The uniquely shaped four-channel fibers provide excellent breathability even when wet, so your body is kept cool and dry during strenuous activity. Coolmax is used in our socks to keep you warm and dry. Garments manufactured with Coolmax fabrics must pass stringent certification tests.

BASE & MID LAYERS

Base Layer:

These microfiber, moisture-wicking fleece fabrics are used in first layer apparel and layering systems for maintaining a perfect "next-to-skin environment". This means that because it is on your skin, it will keep you ultra-warm on a day of cold, wet riding, and keep sweat away – evading that cold, clammy feeling. They have anti-microbial technology and anti-pill durability for long lasting warmth and comfort.

Mid Layer:

Traps air and creates a holding pocket of body heat. Synthetic fibers work even when wet. Low profile moisture wicking performance with incredible warmth and softness.

Polartec® Power Stretch®:

Polartec Power Stretch features body-hugging four-way stretch and is very breathable. The durable nylon outer layer is wind- and abrasion-resistant; the soft inner layer pulls moisture away from your skin keeping you dry, warm and comfortable – without weight. Features compression stretch which can improve performance and reduce the chance of certain types of stop-go injuries. This fabric excels at handling the demands of the next-to-skin environment.

Polaris® Barrier Fleece:

Polaris® Barrier Fleece is a 100% polyester microfleece. Polyester microfleece is similar to traditional polar fleece, yet is comprised of exceptionally fine, micro-filament fibers making it a light and soft choice.

TAKE IT TO THE NEXT LEVEL.

When you ride a Polaris performance trail sled, you have the power, the ride and the handling to turn a good day into a great day. Now let's talk about ways to make your ride even better. Tweak the horsepower with a clutch kit and performance exhaust. Protect the chassis with a matching skid plate. Add storage with the bag of your choice. All Polaris accessories are engineered specifically for Polaris sleds so you know they'll fit, and they're rigorously tested so you know they'll last.

COVERS

PURE COVERS

You bought the best sled on snow, make sure you protect it when it's on the trailer or tucked away for the summer. Pure Polaris covers are built specifically for your sled, so they're easy on/easy off when you out of time and in the cold. And, unlike aftermarket covers, they fit perfectly.

PREMIUM POLYESTER COVERS

These are our best covers, made of heavy polyester, lined and fully featured for a custom fit and the ultimate in sled protection during trailering and storage.

- » Straps have male/female connectors
- » Custom fit to Polaris snowmobiles
- » Easy to install, stays tight and won't get you dirty

STANDARD COTTON COVERS

Nothing is worse than a cover flapping in the wind on the trailer. Pure Polaris cotton covers are rugged, fit your Polaris sled perfectly and feature matching graphics.

Zippered fuel cap access.

Adjustable windshield straps allow you to change windshield height.

Heavy polyester with sewn-in cotton liner and polyester to protect during trailering and storage.

One standard graphic package.

Hookless attachment system installs easily without having to get down between side-by-side machines on trailer.

Zippered fuel cap access.

Heavy canvas conforms to and protects the machine in the toughest conditions - while trailering or in storage.

Adjustable windshield straps allow you to change windshield height.

Bold graphics to match the your sled.

Perfect fit - won't flap in the wind while trailering.

PERFORMANCE EXHAUST SLP® LIGHTWEIGHT SILENCERS

Always seeking greater power and excitement from our sleds, our researchers teamed up with Starting Line Products (SLP®) to co-engineer this premium SLP® Performance Exhaust Silencer. Because it's made exclusively for Polaris, adding the SLP® silencer will not void your warranty like other after-market add-ons.

SLP® PERFORMANCE EXHAUST SILENCERS

QUIET STRENGTH. The way to greater thrills than you thought possible, this exclusive pipe and silencer from top manufacturer SLP and Polaris will crank up your sled's performance with more horsepower and less weight, while keeping engine noise to a minimum.

EPI® Clutch Kits

OVER 75 YEARS OF COMBINED PERFORMANCE-ENHANCING EXPERIENCE.

About the time Polaris was celebrating its 25th anniversary (over 25 years ago), Glenn Erlandson was building parts to boost the performance of his race sleds. It didn't take long before he was selling those parts to other racers. In 1992, he began manufacturing clutch parts and today his company, Erlandson Performance, Inc.®, is known in racing circles around the world. Polaris has teamed up with EPI® to help give your snowmobile a race-bred performance boost.

EPI® CLUTCH KITS - UNLEASH THE TRUE POWER OF YOUR SLED.

A clutch kit boosts performance, creating exceptional backshifting so more power is always ready when you want it. You get strong pull out of the corners and aggressive acceleration. Your sled will reach its top speed quicker, without losing engine dependability. Pure Polaris clutch kits are designed exclusively for Polaris snowmobiles by EPI®. To prevent track spin and maximize traction when using a clutch kit in your sled, Polaris recommends adding traction products to the track. See page 90.

EPI® CLUTCH KITS

- » Designed exclusively for Polaris by Erlandson Performance, Inc.®
- » Kit includes three weights, primary spring, one helix, one secondary clutch spring
- » Strong, aggressive acceleration through all engine RPM
- » Improves acceleration and backshifting for corner to corner performance
- » Clutch kits work with PERC

BAGS + TOURING

BEST BAGS IN THE BUSINESS.

When it comes to snowmobile bags, everyone has different needs. That's why we build so many different styles and sizes. We use ballistic nylon for maximum durability and urethane coatings for water resistance and lasting looks.

A. IQ, RMK UNDERSEAT BAG

- » Fits securely under the seat
- » Perfect for the day long trip
- » Fits an avalanche probe (14.5" long), 280 cu. in. of storage

#2876427 | IQ '08, RMK '08 Underseat Bag

\$39.99 us \$47.99 Can

B. IQ TUNNEL BAG

- » Easily attaches to rear close-off
- » 600 denier material, 1250 cu. in. of storage
- » Matches to sled graphics

#2876333 | IQ '08 Tunnel Bag 121"

\$69.99 us \$83.99 Can

C. SWITCHBACK BAG

- » Easily attaches to rear close-off
- » 600 denier material, 2688 cu. in. of storage
- » Matches to sled graphics

#2876564 | Switchback '08 Bag

\$79.99 us \$95.99 Can

D. SHOVEL BAG

- » Ballistic nylon bag, holds shovel and gear
- » Mounts in integrated T-slots on rear close-off
- » 7.5 lb. capacity

#2876015 | IQ RMK '07-'08 Bag (shovel not included)

\$84.99 us \$101.99 Can

E. REAR CLOSE-OFF BAG

STUDS + CARBIDE SKAGS

WOODY'S® TRACTION PRODUCTS

Hard-packed snow and ice are part of snowmobiling. When you combine the ride and handling of a Polaris snowmobile with traction products from Woody's®, you have the ultimate in acceleration, braking, cornering, control and safety on the trails.

HOW TO GET PURE TRACTION ON ICE AND HARD-PACK SNOW.

Adding traction products to your sled improves acceleration, braking and steering control, especially on hard-pack snow and ice. The more aggressive rider you are, the more traction you need. The key is making sure you have the right balance of traction products on your track and skis.

- 1) Determine how to match your riding style and sled model to the correct number of studs, type of studs and stud pattern.
- 2) Determine the right type and length of turning carbides necessary to balance traction and optimize steering.
- 3) Make sure you have the necessary parts installed to prevent the studs from damaging your sled's tunnel and cooling system.

Problem 1:

Back end is loose in turns.

Cause:

Too much turning carbide on skis in relation to the number of track studs.

Problem 2:

Front end pushes in turns.

Cause:

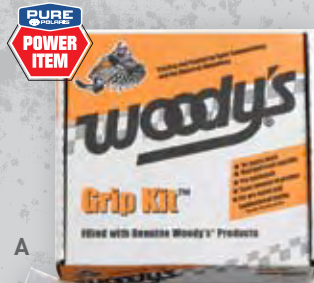

Too little turning carbide on skis in relation to the number of track studs.

Solution:

Ideal Traction.

Sled turns like it's on rails. Amount of turning carbide on skis is balanced with the number of track studs.

A. GRIP KITS

» Value Pack that includes everything you need to stud your track: Gold Digger studs, nuts, backers, a marker and drill bit

Description	96-Pack	US	Can
Grip Kit, 1.325"	#2876555	\$299.99	\$359.99

B. SIGNATURE CARBIDE STUDS

- » Highly corrosive resistant for harsh conditions
- » 60° carbide pin for consistent performance
- » Impact resistant one piece head

C. MEGA BITE CARBIDE STUDS

- » Zinc coated hardened steel shell
- » Added contact surface enhances acceleration and deceleration

D. TRACTION MASTER® CARBIDE STUDS

- » High-carbon alloy steel for maximum durability
- » Head is concave to grip rubber track and maximize rigidity for increased traction control
- » Easy push-through design
- » 5/16" diameter shank

Refer to page 91 for prices and part #'s of carbide studs.

E. ALUMINUM SQUARE BACKER PLATE

- » Strong, lightweight alternative to steel
- » Raised crown for dependable support
- » Available for 5/16" studs

F. STEEL ROUND BACKER PLATE

- » Raised crown for dependable support and the prevention of stud pull through

G. DOUBLE DIGGER BACKER PLATE

- » Both studs anchor within backer for superior traction
- » Included in Grip Kit, made with aluminum for superior strength

H. STEEL SQUARE BACKER PLATE

- » Raised crown for dependable support and the prevention of stud pull through

Refer to page 91 for prices and part #'s of backer plates.

I. STUDDING TEMPLATE AND DRILL BIT

- » For precise placement of traction studs
- » Template allows setting of drilling marks on track surface
- » Holes are clearly labeled and instructions included

OPTIMIZING TRACTION.

Whether you seek more serious traction or need to replace a track, Pure Polaris can help. Our broad lineup of tracks in lengths from 121" to 166" feature a variety of lug styles and patterns. See your Polaris dealer to compare tracks, decide which one is right for your sled, and for installation.

Ripsaw Track

Series 4 Track

Series 5 Track

MOUNTAIN XTREME HIGH-DUROMETER HILL CLIMB TRACK

- » Specially designed for the extreme conditions and the performance demands of hill climb competition
- » Super stiff 1.875 in. deep-finger lugs penetrate and grip hard-packed snow for maximum traction
- » Open window reduces track weight for increased performance
- » Designed to accept ice screws

SERIES 4/5 TRACK

- » Equal parts versatility and durability
- » Stiff lug base for lon wear and hard-pack performance
- » Soft and flexible tips for superior performance in deep snow

RIPSAW TRACK

- » Instant traction and pull
- » Stable acceleration and reliable performance on icy trails and powder

IQ MID WINDSHIELD 12"

» 12" High windshield with fade flame graphic package

#2876465 | Red Flame Fade

\$99.99 us \$119.99 Can

Two screen process to provide deep graphics.

Excellent hand and face protection.

20% thicker than stock for extreme durability.

Quick Change.

Polaris windshields are manufactured with premium vacuum metalized polycarbonate for the ultimate durability and thickness. They are easy to get off and on for changing riding conditions and a great inexpensive way to create your dream sled.

POLARIS WINDSHIELDS.

Tall, low, plain, wild, there's a Polaris windshield to match your needs. And because they go on and off quickly, you can change them with the weather. They're formed from thick polycarbonate, wind-tunnel tested for aerodynamics, and styled with sled-matching custom graphics. Choose from five different heights.

A. IQ TALL WINDSHIELD 16.5"

FLOE® TRAILERS STANDARD FEATURES

Common to all Polaris trailers is FLOE's exclusive Versa-Track (patented) tie-down system. This is the original infinite tie-down system allowing quick lock and release with infinite front-to-back positioning capability. Includes FLOE's patented fast-action Versa-Lock.

All Polaris trailers are made with top-quality extruded aluminum and stainless steel fasteners. This makes them lightweight and versatile, yet strong, stable and virtually maintenance free. Polaris trailer decking is top quality treated 19/32" plywood for years of trouble free use.

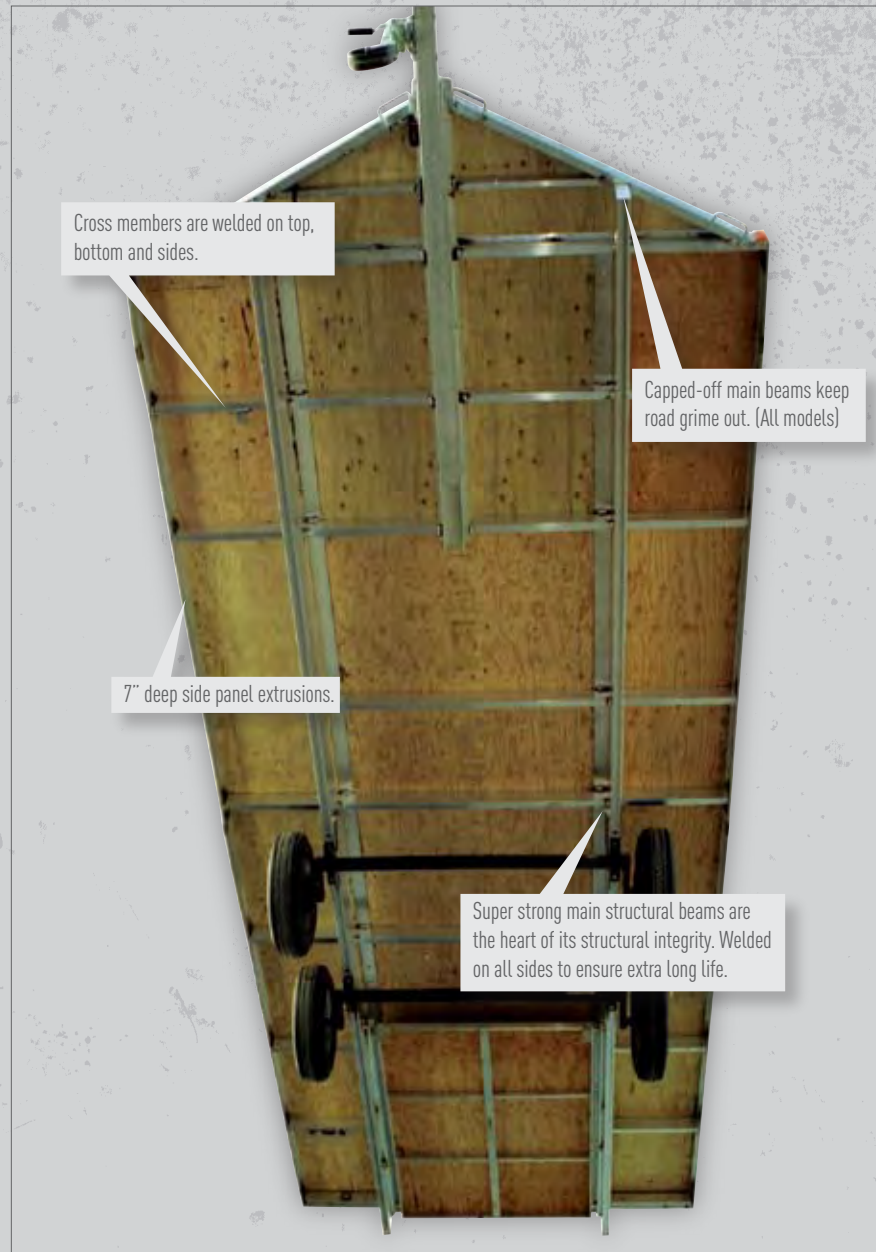

Polaris trailers use rubber torsion axles with Turbo-lube hubs.

FEATURES:

- » Tongue jack standard on 14' - 28' FLOE trailers
- » Coiled safety cables (won't drag on ground)
- » Quality molded wiring harness is encased and protected in the trailer frame for years of trouble-free lighting
- » Molded plugs are used at each light, eliminating wire connectors. It is the best wiring package available
- » Patented reinforced aluminum tubestyle tongue is custom extruded, making it super strong. Optional tongue grab handle available
- » Longer tongue for easier backing and unloading (ramp & v-front tilt models)
- » Sturdy front bumper protects plywood.
- » Front trailer lighting
- » Heavy-duty rectangular tube frame. Unlike "I" or "C" channel frames, FLOE's tube frame won't twist, flex or come apart!

TO ORDER ←

Polaris trailers can be purchased through any FLOE® Polaris trailer dealer. To locate the dealer nearest you visit www.floeintl.com.

TILT TRAILERS

THE PERFECT COMBINATION OF QUALITY AND VALUE.

Patented fast-action tilt clamp (fig.1), is easier because it eliminates the hitch pin which eliminates the vibration and sloppy fit common to inferior trailers. Available in 10' and 12' lengths.

V-FRONT TILT TRAILERS

THE EASIEST DRIVE-ON / DRIVE-OFF TRAILER AVAILABLE

Standard V-shaped front so the optional ramp/salt shield can be used. Simply tilt to load and lower ramp/shield to unload. Extra-long tongue allows enough space between your trailer and tow vehicle to lower both sides of the ramp/shield at the same time without jack-knifing the trailer. Comes standard with gas shock to aid the tilt function and provide the necessary force to keep the deck tilted when loading. Available in 10' and 12' lengths.

ENCLOSED TRAILERS

IMAGINE OWNING AN ENCLOSED TRAILER THAT TOWS SO EASILY YOU'LL THINK IT'S AN OPEN BED TRAILER!

The exceptional aerodynamic design provides you with greater fuel economy and passing power. All aluminum welded frame with heavy .032 gauge smooth aluminum skin. Opens front and rear for easy drive-in/drive-out loading and unloading. Available in 12', 14', 16', 22' and 28' lengths.

POLARIS UTILITY TRAILERS

FOR WORK, FOR PLAY, AND EVERYTHING IN BETWEEN!

These rugged trailers have all the same top-quality features and components as our larger tilt models, including FLOE's patented tilt clamp system, but are sized to carry one snowmobile or ATV. With these dimensions, the utility trailer can be used to haul your ATV into tight spots. Once there, you can unload your ATV and hook up the trailer to your ATV for further use.

FLOE® Trailers is a registered trademark of FLOE International, Inc.

KEEP YOUR SLED PURE.

Insist on Pure Polaris oils and lubricants. They are specially formulated to help you maintain your sled's high performance. Be sure to use them as part of your routine maintenance schedule.

A. PREMIUM SYNTHETIC BLEND 2-CYCLE OIL

- » High-viscosity for peak performance at high engine temperatures
- » Most advanced synthetic blend 2-cycle lubricant on the market
- » Excellent engine protection and detergency
- » Pre-mix or injection

- #2875035 | Quart | 12 per pack
- #2875036 | 1 Gallon | 6 per pack
- #2875037 | 2.5 Gallon | 2 per pack
- #2875038 | 16 Gallon | 1 per pack
- #2875039 | 55 Gallon | 1 per pack
- #2875040 | 330 Gallon | 1 per pack

B. VES GOLD SYNTHETIC 2-CYCLE OIL

- » Cleaner burning, low odor, smokeless oil formulation
- » Designed to improve exhaust valve performance
- » Offers maximum engine protection at high RPM
- » Meets category 4 low temperature requirements
- » Additive components greatly improve exhaust odor

- #2874438 | Quart | 6 per pack
- #2874439 | 1 Gallon | 4 per pack
- #2874443 | 2.5 Gallon | 2 per pack
- #2874440 | 16 Gallon | 1 per pack
- #2874441 | 55 Gallon | 1 per pack
- #2874442 | 330 Gallon | 1 per pack

C. HIGH PERFORMANCE SYNTHETIC RACING OIL

- » Designed to optimize the performance of VES systems
- » The best engine and exhaust valve detergency available
- » Anti-wear additive extends ring, cylinder and bearing life
- » Pre-mix or injection
- » Easy-pour spout

- #2873025 | Quart | 6 per pack
- #2873023 | 1 Gallon | 4 per pack
- #2873919 | 16 Gallon | 1 per pack

D. 4-STROKE OIL CHANGE KIT

- » Kit includes three 1-qt. bottles of premium PS-4 0W-50 synthetic engine oil, filter and jumper harness

#2875522 | FS, FST

E. PS-4 0W-50 SYNTHETIC OIL

- » Full synthetic designed for exclusively for Polaris 4-stroke engines
- » Excellent cold weather start-ability plus ultimate engine protection in severe operating conditions

#2874865 | Quart | 6 per pack
 #2874867 | 55 Gallon | 1 per pack

F. ISOPROPYL FUEL DE-ICER

- » High-tech additive prevents fuel line freezing in extreme cold conditions
- » Formulated for 2-cycle and 4-cycle Polaris engines
- » 1/2 ounce treats 1 gallon of fuel

#2870505 | 12 oz. | 12 per pack

G. PREMIUM FUEL STABILIZER

- » Prevents gasoline oxidation and fuel system corrosion
- » Significantly reduces gum and varnish formation
- » Protects yellow metal and rubber fuel system components
- » Formulated for 2-cycle and 4-cycle Polaris engines

#2870652 | 1 Quart | 12 per pack
 #2872280 | 2.5 Gallon | 12 per pack

SERVICE PARTS & CHARTS

ACCESSORIES

A. PREMIUM SYNTHETIC CHAINCASE LUBRICANT

- » Prevents rust, oxidation and corrosion of internal chaincase components
- » Synthetic formula engineered and tested by Polaris for snowmobile chains and sprockets
- » Provides maximum protection for extreme operating temperatures
- » Low sulfur additive resists thermal break-down

#2873105 | 1 Quart | 2 per pack

#2873106 | 1 Gallon | 1 per pack

#2872952 | 2.5 Gallon | 1 per pack

B. CARBON CLEANER FUEL TREATMENT

- » Patented additive displaces moisture
- » Excellent fuel stabilizer for storage
- » Formulated for 2-cycle and 4-cycle Polaris engines
- » 1 ounce treats 1 gallon of fuel

#2871326 | 12 oz. | 12 per pack

C. HYDRAULIC BRAKE FLUID

- » Designed for use in Polaris hydraulic brakes
- » Superior high temperature characteristics
- » Anti-corrosive additives extend the life of brake system and ensures consistent, positive braking

#2870990 | DOT 3 12oz. | 12 per pack

#2872189 | DOT 4 12oz. | 12 per pack

#2873717 | High Temp (550° F) 12 oz. | 6 per pack

ASSEMBLY LUBE

- » Engine assembly lube (cross shaft break-in)
- » 440/500 domestic

#2872435 | 8 oz. | 12 per pack

#2872436 | 2.5 gallon | 2 per pack

D. GAS SHOCK OILS

- » Engine assembly lube (cross shaft break-in)
- » 440/500 domestic

#2875522 | Walker-Evans - 5 wt. - 1 Quart | 6 per pack

#2870955 | Premium Fox - Quart | 6 per pack

#2872279 | Premium Fox - 2.5 Gallon | 2 per pack

#2873716 | Premium Ryde FX - 1 Quart | 6 per pack

E. 110/116 OCTANE RACING FUEL

- » Consistent blend, excellent shelf life
- » Faster than ordinary fuel
- » Engineered and tested by the Polaris Factory Race Team to meet the demands of high-horsepower stock and modified racing engines
- » Legal-stock fuel for most race sanctions; dilute to meet specific octane requirements
- » Maximum horsepower potential

#2872982 | 16 Gallon | 110 Octane

#2872983 | 55 Gallon | 110 Octane

#2875517 | 16 Gallon | 116 Octane

*For color codes See Polaris Pure Paint Order form on www.polarisdealer.com

I. PREMIUM ANTI-FREEZE

- » Keeps cooling systems flowing at radical sub-zero temperatures
- » Formulated specifically for Polaris snowmobile and ATV high-performance aluminum cooling systems
- » 60/40 pre-mix with deionized water, effective to -62° F

#287-1534 | 1 Quart | 12 per pack

#2871323 | 1 Gallon | 6 per pack

#2872278 | 2.5 Gallon | 1 per pack

F. ALL PURPOSE CLEANER

- » Removes road film, soil, grime and grease without affecting painted surfaces or streaking

#2855667 | 1 Gallon

#2855668 | 5 Gallon

#2855669 | 30 Gallon

G. HEAVY DUTY CLEANER

- » Removes dirt, oil, tar, ink, paint and grease from floors, walls, equipment, parts and engine parts, Ideal for water-based parts washer

#2855664 | 1 Gallon

#2855665 | 5 Gallon

#2855666 | 30 Gallon

H. VEHICLE WASH

- » Superior cleaning ability on heavy mud, road film and grease in all water conditions, dries streak and spot free

#2855660 | 1 Gallon

#2855661 | 5 Gallon

#2855662 | 30 Gallon

#2855663 | 2 Gallon Sample Kits of All Purpose, Heavy Duty Cleaner and Vehicle Wash

SERVICE PARTS

PURE PRECISION.

Polaris service parts are made with the highest level of quality, durability and performance. When your Polaris snowmobile needs replacement parts, always insist on the best—genuine parts from Pure Polaris.

TEAM® ROLLER SECONDARY CLUTCH

- » Smoother upshifting
- » Quicker backshifting
- » Reduced friction
- » Promotes easy gliding
- » Makes clutch tuning easier

#2874976 | Team Roller

\$259.99 us \$339.99 Can

CLUTCH PULLERS

- » The highest quality clutch pullers on the market
- » Precise machining for accuracy
- » Manufactured from the highest quality steel and heat treated for superior strength
- » Tool used to pull primary clutch off engine

#2875565 | All models to '98 P85/P90 except domestic twin engines

\$34.99 us \$49.99 Can

#2875566 | All models to '97 -'99 Domestic Twin Engines except '99 440 EDGE

#2875567 | All models to '00 -'08, Domestic Twin Engines '99 -'03, 440 XC EDGE '99 -'03, 700 and 800 XCR, All '06 -'08 4-stroke engines

#2875568 | All '99 -'03 Fuji motors except 700 and 800 XCR 340 Deluxe and Touring, 500 Carbureted engine, 600 Triumph

*All R-Series, MOD(M), T-1, and 40-36 Helix Ramps are cut 0.060" deeper in snap ring sprocket. These are made so the driven clutch can open far enough for full shift with wide 1 7/16" belts.

If these helix ramps are used with narrow belts two additional .030" washers (#7556804) should be used to prevent the belt from touching the inner hub at full shift.

*If using an R1 - R12, 34M, 36M, T-1 or 40-36 use two additional .030" washers (#7556804) under the snap ring, for a total of three washers on all models except 600, 700, 800 they use the existing washer that is already there.

CLUTCHING DRIVE BELT

- » Belt dimensions given are nominal dimensions.
- » There is a +/- variance for all critical dimensions. Clutch set-up must be inspected when a new belt is installed and, if necessary, clutch set-up must be adjusted.
- » The drive belt is an important component of the converter system. In order to achieve maximum efficiency from the onverter, drive belt tension (deflection), clutch offset, and alignment must be adjusted properly.

Part#	Projected Belt Width	Side Angle Overall	Center to Center	Outer Circumference	Notes
#3211042	1.375 (34.93 mm)	32	12	47.25	Service part from older P-85 systems '96-prior

#3211117	1.46 (37.1mm)	26	13.19	45.79	

GENERAL BELT SELECTION GUIDELINES - Refer to appropriate parts manual for proper belt. Production belt is recommended unless tuning for a specific application.

CVT

- » Increased service life for higher horsepower and extended high speed running
- » Need 1-2 grams heavier drive clutch weight
- » Good for prolonged high speed running
- » Good for aggressive riders

STANDARD COMPOUND

- » More aggressive at low speeds
- » Reduced heat and drive clutch sheave wear
- » Used for short, higher horsepower runs (drag racing)
- » Good trail belt for lower horsepower engines

CLOSE TOLERANCE EDGE DRIVE BELTS

- » Consistent high performance between belt changes for easier clutch tuning
- » Individually precision measured to meet the specific length and width for optimal performance of EDGE model

STANDARD BATTERY

- » All batteries competitively priced, average savings of more than \$5.00 per battery versus the leading competition
- » Good cranking amps for all starting applications; plenty of capacity for accessories
- » Easy to see electrolyte check

ALL EDGE CLASSIC MODELS '00 -'06

- » Designed to withstand severe vibrations
- » Special chemical makeup to resist the formation of sulfation on the plates.
- » 30% more cranking power than a standard conventional battery
- » Cold Cranking Ampere
- » 0° F (-18° C), 190 amp
- » 32° F (0° C), 230 amp
- » Made in the U.S.A.

ALL FRONTIER MODELS '03 -'05

- » Patented separator to provide improved cranking power
- » Heavy Duty Glass Mat to resist shedding of active material during vibration
- » Patented sealed posts that prevent acid seepage and reduces corrosion for extended battery life
- » Polypropylene cover and container for superior impact resistance in extreme weather conditions
- » Cold Cranking Ampere
- » 0° F (-18° C), 300 amp.

FINANCIAL SERVICES

StarCard Financing – Most convenient & quickest way to get a unit financed today!

- ➔ Financing options are available on all products in your dealership, both new & used, Polaris and Non-Polaris products
- ➔ Offers NO insurance and NO down payment requirements
- ➔ Opportunity to enhance dealership profitability
- ➔ Offers low monthly payment and fixed interest options
- ➔ Instant credit decisions

POLARISTAR PROTECTION PLUS

Protect your customer's investment and give them the opportunity to ride worry-free.

POLARISTAR is protection backed by Polaris. It is the only extended mechanical breakdown coverage backed by Polaris. Protection is for all factory installed mechanical and electrical operating components. We offer coverage terms from 12 months to 5 years, with either a \$0 or \$50 deductible option. There are no mileage or hour limitations on covered parts.

Polaris provides coverage for vehicle repairs for 12 months – just a fraction of the life of a vehicle. The **POLARISTAR PROTECTION PLUS** plan provides coverage, and minimizes exposure to potential repair costs for up to 5 years.

Extended coverage protection typically costs less than one moderate failure. Protect your customer from these costly repairs.

Component, System or Part	Estimated repair cost WITHOUT POLARISTAR PROTECTION PLUS
Engine Overhaul	\$2,000 - \$2,500
Transmission Overhaul	\$1,800 - \$2,000
Differential Overhaul	\$1,000 - \$1,100
Cooling System	\$400 - \$600
Drive Axle Repair	\$600
Front Suspension	\$500
Starter	\$500

You can finance an Extended Service Contract for only \$10 more a month. Your customer most likely can afford \$10 more a month but most likely won't be able to pay for a major repair.

Help protect your customer's investment by offering them **POLARISTAR PROTECTION PLUS**.

See customer brochure for more information.

*On approved Polaris StarCard accessory purchases. The estimated Minimum Monthly Payment is based on the products and US purchase prices shown. The amount of your total Minimum Monthly Payment will depend on additional purchases and account balances. See Cardholder Agreement and DisclosureStatement for details.
