**THE PARTS AND ACCESSORIES IN WHICH YOU RELY ON
ARE ONLY AS GOOD AS THE ENGINEERING BEHIND IT.**

That's how every Polaris Engineered™ part and accessory becomes a natural extension of your riding experience. We meticulously design, test, and optimize everything we create until it's right for you. From modern style, fit and finish, to seamless integration and perfect functionality. Your sled isn't finished until you ...

MAKE IT YOUR OWN

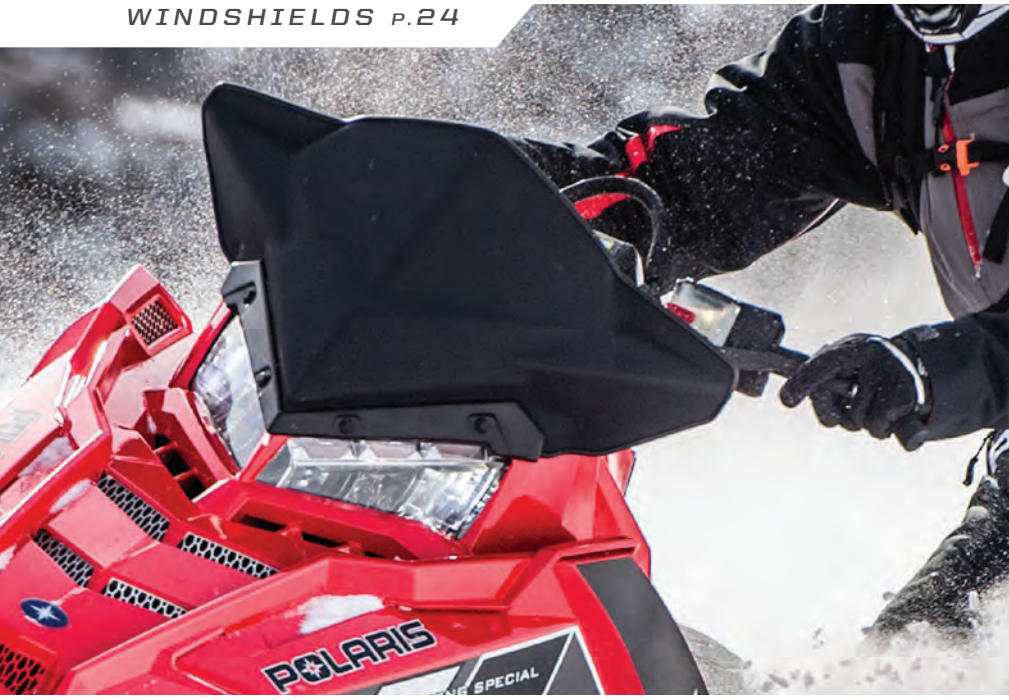

LOCK & RIDE®

**PERFECT FIT.
EASY ON & EASY OFF.**

Lock & Ride® functionality delivers the perfect solution for attaching accessories to your sled. Thanks to its patented securing system, you can mount and unmount without the need for any tools, and you know the fit will be perfect every time.

Polaris Engineered Accessories™ are engineered alongside your sled, so they're ready to dominate any terrain. From bags and racks to bumpers and windshields, we produce a complete line of perfect-fitting accessories.

LOW

FIND YOUR PERFECT SIGHTLINE

Blend protection and style with the windshield built just for the type of riding you do most.

TALL

The choice when you want maximum wind protection. Perfect for riders who ride in colder conditions often.

MID

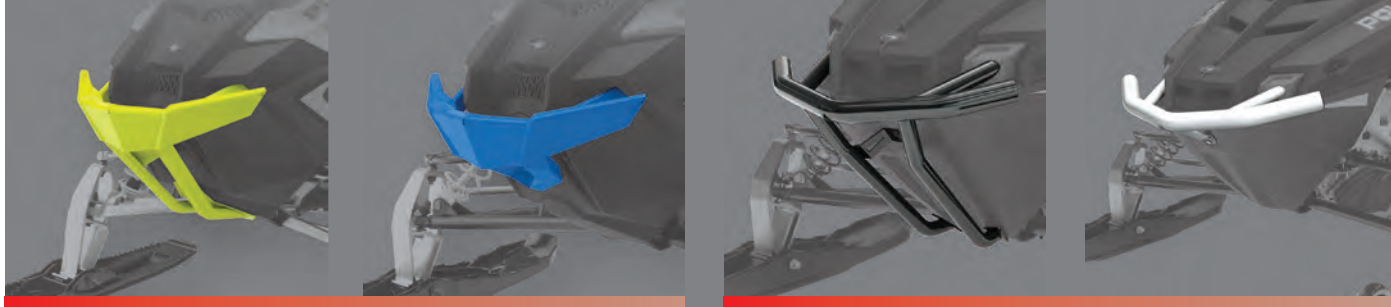

Best of both worlds: a clean look for your sled, yet also offers wind protection for colder days.

LOW

For a sleek, clean look on your sled. Does not affect vision in any way. Great for riders who stand up most of the time.

FRONT BUMPERS

MY15-18 AXYS, MY10-18 PRO-RIDE® (EXCLUDING 550 MODELS). MUST ORDER INSTALL KIT WITH DISPLAY. REQUIRED PARTS TO INSTALL FOR POLARIS® INTERACTIVE DIGITAL DISPLAY

PIDD INSTALL KIT

- » **AXYS** | 2880493
ALL AXYS®
- » **PRO-RIDE** | 2880495
REQUIRES LO-PRO DEFOST BAG (2879090)

DON'T HAVE AN ELECTRIC START?

For a better experience with no electric start, install:

PIDD POWER UP KIT

- » 2882200
» BATTERY SOLD SEPARATELY (4016625) ON P. 33

Advantages with this kit include:

- Maintain GPS lock when you start your sled back up. (without battery kit, satellite will need to relocate, which can take up to 30 seconds while moving)

- Display will not shut down and reboot every time your sled is shut off
- Display has ability to run while sled is turned off, which allows you to use the screen while stopped

POLARIS® MESSAGE CENTER (MC) GAUGE

- 25% larger display area than old gauge design
- Large, easy-to-read LCD screen measures 109mm
- Convenient scrolling message capabilities communicate vehicle information
- External vertical warning lights relay information at a glance
- Two screen color options (red or blue)
- » 2882119
ALL AXYS®
REQUIRES INSTALL KIT (2882120).

SHOCKS

SHOCKS DIRECTLY FROM THE FACTORY ARE CALIBRATED FOR A WIDE RANGE OF RIDING STYLES AND BODY TYPES. Depending on which modifications you bolt on after you purchase your sled, the suspension performance may need to be improved. That is why Polaris® is ready with a multitude of suspension options for your ride. Dial in your perfect ride with offerings from trusted names like Walker Evans® and FOX®. Each shock is fully rebuildable and optimized for your style. Polaris® also offers other suspension and chassis tweaks like bogie wheels and sway bars.

WALKER EVANS® TRAIL PERFORMANCE SHOCKS

- External hi/lo ProDial compression damping adjustment
- Piggyback reservoir provides increased oil and nitrogen volumes for fade-free performance
- Velocity- and position-sensitive needle damping
- Ultra-progressive MCU bump stop
- 100% designed, engineered and manufactured in the U.S.A.
- Fully rebuildable and revalveable

OPTIMIZING TRACTION AND CONTROL

MOUNTAIN

Riders need flotation and the ability to carve in deep snow

CROSSOVER

Riders want the perfect balance between on-trail performance and off-trail flotation

TRAIL

Aggressive trail riders who frequently encounter icy conditions will benefit from studded tracks and skis with more aggressive carbide wear bars

SKIS

Add Gripper Skis for a deeper keel, greater flotation, and positive steering in deep, loose snow.

Choose Pro-Steer Skis if you prefer more trail riding or Gripper Skis if you use trails to get to your next jump-off point.

For true trail performance, add the Polaris Engineered™ Pro-Steer Ski—specially designed with a low-profile keel.

CARBIDES

For added trail capability, use 102mm carbides.

For improved cornering while not compromising deep-snow performance, use 152mm carbides.

Dual-runner carbides like the Dooly or Slim Jim reduce darting, while increasing corner performance and stability in and out of the apex.

TRACK/STUDS

Choose a track based on your sled's rail length. Run a deeper lug and more aggressive track pattern the softer and deeper the snow.

For perfect balance on or off the trail, choose a track with a lug depth between 34mm and 44mm. If you ride off-trail more, choose the lug depth that works for the depth of snow.

Choose a track based on your sled's rail length and add the number of studs based on your sled model and whether you're a trail, performance, or intermediate rider.

CARBIDE WEAR STRIPS

Carbides, like other items on your sled, need to be replaced periodically because they wear down as you ride your sled on the trail. Rocks, cement, pavement, road crossings can all contribute to carbide wear.

CHOOSE YOUR LENGTH

76MM - 102MM CARBIDE

152MM CARBIDE

203MM CARBIDE

- The most common length of carbide, perfect for sleds with a 121" track with 96 studs or less or sleds with 25mm lugs taking corners at moderate speeds.
- Ideal for high performing sleds in the 136" track range with up to 32mm lugs or a shorter track sleds with more than 96 studs.
- Best for ultimate performance sleds with a 144" track or longer with paddles and/or the maximum amount of studs.

BITEHARDER® CARBIDE SHARPENER

- Designed to be used with portable drill for sharpening anywhere
- Carbide wear bar sharpening tool for use on the trail or in the shop
- Quickly and easily puts a fresh edge on wear bars for improved handling
- Delivers more precise and accurate handling, especially in the corners
- Features long lasting V-shaped, diamond-coated sharpening stone
- Long-lasting diamond media can sharpen up to 40 wear bars

» 2882952

CROSSOVER

- Arched lug design with staggered snocross-inspired pattern for excellent soft snow traction
- 64mm drive pitch for BackCountry, 73mm and 76mm drive pitch for BackCountry X
- BackCountry X 73mm drive pitch models feature tapered lug on outside edges for improved durability
- Now available in 76mm drive pitch for BackCountry X

LENGTH	PITCH	
3048mm	73mm	5414894
3073mm	64mm	2839140
3480mm	73mm	5414895

- Cupped lugs for superior acceleration and braking in loose soft snow conditions
- Flexible lug design for superior off-trail performance
- Designed for ICE Technology, select lugs are more rigid for traction on hard-packed snow performance

LENGTH	PITCH	
3480mm	73mm	2839246

TRAIL

- Cupped lugs for superior acceleration and braking in loose, soft snow conditions
- Flexible lug design for superior off-trail performance
- Softer, thinner lugs generate less noise for improved rider comfort

LENGTH	PITCH	
3073mm	64mm	2839052

- Rigid lugs provide superior handling, acceleration, and braking on groomed trails
- Narrow lug base to reduce rolling resistance and maximize top speed
- Angled profiles for aggressive forward and lateral bite

LENGTH	PITCH	
3073mm	64mm	2839968

- Tapered outside lug edges for less side bite when cornering
- Sharp angled lugs for excellent bite on hard-pack snow
- Cupped center and full outer lugs for traction on loose, less compacted snow
- Lug design generates less noise for improved rider comfort on hard-packed groomed trails

LENGTH	PITCH	
3073mm	64mm	2839214
3480mm	73mm	5414654

- Factory pre-studded for improved traction and control
- Lug design delivers better traction than the ICE RipperXT
- Optimized rubber compound for superior traction on groomed trails

LENGTH	PITCH	
3048mm	64mm	2839028
3048mm	73mm	2839190
3073mm	64mm	2839200
3480mm	73mm	2839191
3658mm	64mm	2839203

- 25mm lug height for low rolling resistance that improves fuel economy
- Crescent lug features recessed tips and cutting edges for forward and lateral bite on hard-pack
- Hard-wearing rigid lugs for mile after mile of dependable use
- Narrow lug base to reduce rolling resistance and maximize top speed

LENGTH	PITCH	
3454mm	64mm	5413318

MOUNTAIN

- Polaris® exclusive
- Ideal track to provide lift in the deepest, softest snow conditions
- Features a new lightweight single-ply design optimized for weight and powder snow performance

LENGTH	PITCH	
3937mm	76mm	5415393
4140mm	76mm	5415394
4420mm	76mm	5415786

- Outstanding traction and control in deep snow
- Lugs provide tremendous flotation and great performance
- 66mm lugs provide outstanding traction in all deep snow conditions
- Design provides outstanding flotation and control

LENGTH	PITCH	
3937mm	73mm	5415391
4140mm	73mm	5415392

- Industry-leading deep powder track; for 8T drive sprockets, 73mm pitch
- Optimized lug pattern producing 19% more forward lug contact compared to our Series 5.0 track
- Soft and flexible tips for superior performance in deep snow

LENGTH	PITCH	
3937mm	73mm	5413622
4140mm	73mm	5413621

- Delivering unrivaled acceleration on hardpack snow with designed lift and floatation for deep powder
- A great all-around track for those who need the acceleration and traction of a stiffer lug with the floatation and lift

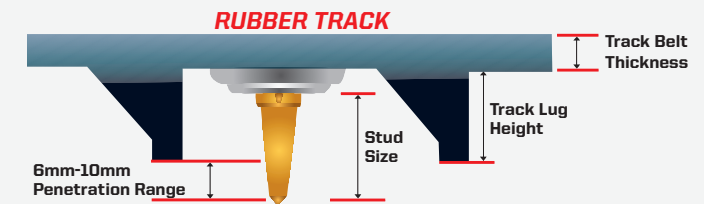

LENGTH	PITCH	
3937mm	73mm	5415002

- The standard in 51mm deep snow tracks; for 9T drive sprockets, 64mm pitch
- Equal parts versatility and durability
- Stiff lug base for long wear and hard-pack performance
- Soft and flexible tips for superior performance in deep snow

LENGTH	PITCH	
3658mm	34mm	5413073

RIP WITH AN IRON GRIP

Track studs allow you to dominate terrain as far and as fast as you can see. The right stud improves acceleration, braking, steering, and control, especially on hard-packed snow and ice. The more aggressive your riding style, the more traction your sled needs to perform at its best.

CHOOSING THE RIGHT STUD

1. Determine your riding style and terrain.
2. Find sled model info and number of studs required.
3. Determine length of turning carbides to balance traction and steering.
4. Make sure the studs won't interfere with your tunnel or cooling system.

FOR THE LIFE OF YOUR RIDE

Maintenance is the key to keeping your Polaris® snowmobile performing as well as the day you bought it. Items like belts, lubricants and batteries represent only a few of these critical items engineered specifically by Polaris®.

CHECK OUT OUR [PARTS FINDER ON POLARIS.COM](http://PARTS.FINDER.ON.POLARIS.COM) FOR EASY PARTS LOOK-UP, PARTS IDENTIFICATION, VIEWS OF ASSEMBLIES AND MORE!

POLARIS ENGINEERED™ DRIVE BELTS

Polaris Engineered™ belts deliver unmatched performance for your sled. Our belts are developed for and tested on all our engines, for all riding conditions to ensure it doesn't just fit your machine—it outperforms your expectations.

FIND THE RIGHT BELT FOR YOUR MACHINE IN OUR ONLINE PARTS CATALOG AT POLARIS.COM

*Belt dimensions are given in nominal dimensions. There is a +/- variance for all critical dimensions. Clutch setup must be inspected when a new belt is installed and should be adjusted if necessary. The drive belt is an important component in the CVT system. In order to achieve maximum efficiency from the converter, drive belt deflection (tension), clutch offset, and alignment must be adjusted properly. See your Service Manual for further details on drive belt measurement inspection.

POLARIS ENGINEERED™ OIL

Polaris Engineered Lubricants™ are the only fluids developed, tested and approved by Polaris® engineering for use in Polaris® Snowmobiles. Polaris® Engineers rigorously test every fluid before it can earn the right to wear the Polaris Engineered Lubricants™ name. Hundreds of hours on the dyno and thousands of miles on the trail insure Polaris Engineered Lubricants™ provide reliability and performance Polaris® riders expect from their snowmobiles. Protect your investment, use Polaris Engineered Lubricants™.

WHICH ONE IS RIGHT FOR ME?

Polaris® offers three distinct lines of lubricants depending on your engine and performance needs.

VES

Polaris Engineered Lubricants™ Full Synthetic VES 2-cycle engine oil provides maximum engine protection for all Polaris® VES applications. Full-synthetic base oil formula has excellent load carrying abilities to reduce engine wear and provide easy starting in extreme temperatures. Engineered to keep VES exhaust valves clean, offers low smoke and excellent lubricity.

VES RACE

Polaris Engineered Lubricants™ VES Race has been formulated and tested by Polaris® Factory Racing to perform in Polaris® 2-cycle engines in racing and high-performance applications. It uses full-synthetic base stocks with state-of-the-art industry chemistries to provide ultimate film strength. Friction modified for improved lubricity and anti-wear additive chemistry to extend ring, cylinder and bearing life under high RPM/high load applications.

POLARIS® BLUE

Polaris Engineered Lubricants™ Blue is a smokeless synthetic blend oil that has been formulated to provide superior engine protection and performance in all fan cooled 2-cycle injector, pre-mix and non-VES liquid cooled engine applications. Features high lubricity for top engine protection in specified applications. Easy-start formula reduces pull effort by up to 45%.

WHY SHOULDN'T I USE A LOW-COST AFTERMARKET ALTERNATIVE?

Simply put, aftermarket brands don't have access to Polaris® testing data and engineering resources. An aftermarket company must spec an oil to an industry-wide standard that considers many different operating parameters.

Polaris Engineered Lubricants™ are developed together with the engine. At each step, the lubricant is validated to work

properly with the Polaris® engine and its internal components. Polaris® has its own set of standards for its engines, just like our competitors. When you purchase Polaris Engineered Lubricants™, you know they were developed with and for *your* engine.

You bought the best sled—use the best oil.

CARBON CLEAN

- Advanced formula with 5:1 powersports treat ratio
- Removes carbon deposits from valves, piston rings, and combustion chamber
- » 355mL | 12 per case | 2881413

ADVANCED FUEL TREATMENT

- Advanced formula with 5:1 powersports treat ratio
- Dual antioxidant formula protects jets and fuel system from gum and varnish
- Stabilizes fuel for up to 2 years
- » 355mL | 12 per case | 2881416
- » 9.5 Liters | 2 per case | 2881417

SCENTED ADVANCED FUEL TREATMENT

- 30mL pouch treats 18.9 Liters of fuel
- Strawberry and mint formulas provide pleasant fragrance through the exhaust system
- » 25 - 30mL pouches | Strawberry | 2881419
- » 25 - 30mL pouches | Mint | 2881418
- » 25 - 30mL pouches | Unscented | 2881420
- » 75 - 30mL pouches | 25 each, Strawberry, Mint & Unscented | 2881421

VP RACING FUELS

- Developed with VP Race Fuels and tested by the Polaris® Factory Race Team to meet the demands of high-horsepower stock and modified racing engines
- Legal-stock fuel for most race sanctions; dilute to meet specific octane requirements
- » 110 Octane | 18.9 Liter Pail | 2880305
- » 110 Octane | 204.4 Liter Drum | 2880304
